Programming in C - Mr. Vivek Sharma S

Switch Statement

- The switch statement in C language is used to execute the code from multiple conditions. It is like if else-if ladder statement.
- Syntax:

```
switch(expression){
    case value1:
        code to be executed;
        break;
    case value2:
        code to be executed;
        break;
    case value3:
        code to be executed;
        break;
    default:
        code to be executed if all cases are not matched;
}
```
